

I am reaching out to you because I am looking for a couple of mutli trade maintenance folks to work for Beach Oil Company. Position does support of our retail and wholesale operations. We are truly looking for a “handyman” who can do many different tasks. We would consider a more specialized person if they were good, such as HVAC specialist, but overall the work in multi skilled work.

Wondering if you have anyone there who is close to graduating and looking for work? Please let me know.

Thank You

Matt
